**CONFIGURABLE & INTELLIGENT ERP for LOGISTIC SERVICE PROVIDERS.**  
**PROVEN. TESTED. RECOMMENDED.**

When you only have time to work with the best,  
choose solutions that are Certified for Microsoft  
Dynamics.

Logiqstar is an integrated software solution designed to handle all aspects of the business of a freight forwarder, harbor company, or any business delivering logistics services to customers globally.

Developed using Microsoft Dynamics NAV ERP technology, Logiqstar is known to have helped organizations become more productive, more accurate, and especially to have a broader insight into the future than their competitors.

With Logiqstar our customers aim to solve many of the freight & logistics challenges, increase efficiency, get more control, reduce errors and minimize risks.

Logiqstar is a certified Microsoft Dynamics ERP with a clear view on the future and roadmap. Today you can already benefit of the following functionalities, which are modular build to allow you to select what you need for your business:

- Accounting
- Pricing & Procurement Management
- Order Management with workflow engine, operational & financial status follow up
- Document Template Management (Word, Excel, PDF, Outlook)
- 3th Party Inventory Management (Physical & Commercial stock)
- Customs Declarations with Direct Communication to PLDA & NCTS
- Customs Warehouse Management (Customs stock fiches and follow up)
- Harbour Resource Management & CEPA Interface
- Finance & Controlling & Reporting
- Business Integration Layer
  - E-Orders
  - E-Inventory
  - Online Partner Portal

## CONFIGURABLE & INTELLIGENT ERP for LOGISTIC SERVICE PROVIDERS. PROVEN. TESTED. RECOMMENDED.

Logiqstar stands for Logistics, Quality, Sea, Truck, Air and Rail. It is unique and completely adapted to fit your business needs as logistic service provider. Here are a couple of reasons why you should choose for our solution:

- It is Microsoft. Everybody knows how to use it, because it looks familiar.
- It is part of the Microsoft Suite and therefore integrated with products like Office 365, PowerBi and SharePoint.
- It is available on Premise (buy) and in the Cloud (per user per month).
- It can be accessed via any device, whether it is a PC, a tablet or smart phone.
- It is supported globally. No matter where your business expands, Logiqstar will grow along with your business.
- It is engineered by logistics specialists. Our consultants come from the business, and are not just IT people.
- Through its flexibility and configurability, it can be adapted to your growth and changing business needs.
- It terminates the difficulties of having separate and independent systems, integration processes, disconnected financial data. Logiqstar is one single system for all areas.

See how Logiqstar has helped these logistics companies:

**Matthias D'hondt, CEO of Molenbergnatie** - *"Logiqstar supports the specific requirements of port operators and ensures that IT is no longer limited to the back office, but affects all processes, all the way to the operations in the terminals."*

**Nils Beyers, Owner of CargoFlow** - *"After 15 years of experience in the logistics sector I founded my own company and heard about Logiqstar in my search for a good software solution in the cloud. After checking out all options, I have chosen for Logiqstar due to the fact it's not only build for the big guys, its user friendliness, ease of access via the cloud... If you ask me about the price, it's fair. Considering all the extra possibilities you get and the increase of efficiency when using Logiqstar."*
